

**Caitlin Brateng**

I have been lucky to be the EP Program Coordinator at Children's Hospital Colorado for the last seven years. During my time at CHCO I have had the opportunity to build partnerships with multiple multidisciplinary teams in and outside of our hospital to drive QI projects and new programmatic partnerships forward. I have also been an active member of the PACES Allied Professional working groups during these years and have watched the PACES AHP group grow and flourish from previous leadership. I consider myself to be a detail-oriented problem solver that enjoys working on large programmatic projects and growth. I believe these assets would fit well to support the PACES Executive Committee and Allied Health Professional group in the coming years. I would be glad to contribute my time and efforts to the PACES executive committee, given the opportunity!
